

# HEALTHCARE CONSTRUCTION

WE KNOW HEALTHCARE.

**Wolverine Building Group** has completed more healthcare construction in West Michigan in the last 10 years than any other contractor. Our vast healthcare experience includes several spaces from medical office buildings to large multi-level hospitals, including renovations, suite build-outs, expansions, and new construction.

Wolverine's resume' is extensive and includes standard spaces such as emergency departments and radiology departments, to many unique spaces including neonatal intensive care, and operating room renovations in an active hospital. Wolverine is also well equipped to serve many non-clinical healthcare facility needs such as bridges, tunnels, helistops, parking ramps, food services, office and lobby renovations.

**WE PROVIDE A COMPLETE ARRAY OF PROJECT SERVICES:**

- Pre-construction Services
- Sustainable (LEED) Construction
- Design Support
- Constructability Analysis
- Value Engineering
- Remodeling/Additions
- Phasing/Logistics Planning
- Life Cycle Cost Analysis
- Building Information Modeling (BIM)
- Construction Supervision
- Equipment Handling
- Local & DBE Involvement

*"Wolverine has been wonderful to work with. Their team is top notch at every level. They are knowledgeable about the specific needs of the healthcare industry and have easily applied the LEED concepts our hospital embraces. They have kept our projects on schedule and within budget through vigorous management of their subcontractors."*

Roberta L. Jelinek,  
Director of Strategic Initiatives  
Saint Mary's Health Care

*"Your team at Wolverine was always on top of things and very helpful with an eye on the end result, bringing the project in 'on time and under budget!'"*

-Lon Morrisson,  
Director of Facility Planning and Development  
Spectrum Health

**HEALTHCARE IS DIFFERENT, AND WE GET IT**

Our specialized health care team is led by seasoned Project Managers and Superintendents with extensive backgrounds in the unique needs of healthcare projects. We are highly trained in the phased construction and meticulous planning required to complete projects around patients without disrupting their care. We are fully knowledgeable with the quality, cost, and schedule controls needed for a successful healthcare construction project and can effectively communicate with all parties concerned, including doctors, nurses, administrators, etc.

**INFECTION CONTROL**

With the quality of patient care being the top priority to any healthcare provider, infection control becomes vital to the success of a project. Our staff is thoroughly trained and able to incorporate methods to reduce the risk of infection and any potential harm to patients. We coordinate with facility management to prevent and control airborne contamination.

**SOPHISTICATED HEALTHCARE TECHNOLOGY**

We understand the design and structural requirements needed to incorporate the sophisticated equipment within a healthcare facility. Often times the placement of equipment and the design of the facility itself can impact the efficiency of patient care. Facilities need to be designed and constructed with built in flexibility to handle the rapid growth and advancements of medical equipment and technology.

**LEED/ SUSTAINABLE CONSTRUCTION**

Wolverine has several LEED Accredited Professionals on staff as well as many Green Advantage Certified Practitioners in the field. Our team will analyze the design and materials to be used and offer suggestions for any applicable sustainable techniques that can be incorporated. We then track progress and determine if any additional measures need to be taken to ensure the desired LEED certification level.
