

FOR IMMEDIATE RELEASE

Wolverine Building, Inc. Expands and Renovates Crippen GMC

Lansing, MI (January 28, 2008) - Wolverine Building Inc. has started the expansion and renovation of Crippen, Buick, Pontiac, GMC, Mazda, Volvo's current facility, located at 8300 W. Saginaw in Lansing.

To better service the needs of Crippen's clients, Wolverine will create a fresh 5,000 square foot Mazda/Volvo new car showroom. GM will expand the existing showroom space and go through a total Buick Pontiac GMC image update program. Six additional service bays will be added to the existing services area for the Mazda/Volvo customers. In addition two existing service bays will be converted into a service write-up for Mazda/Volvo with offices and a waiting area. All building exteriors will receive new metal panels and new up-dated signage. The existing GM showroom will receive a new front entry through a new modern entrance kiosk. The expansion and renovation will be completed in July of 2008.

According to Jim Ziegler, Project Manager for Wolverine, "The new facilities will satisfy the need for separation between Buick/Pontiac/GMC products and the Mazda/Volvo products. The new image for the Buick/Pontiac/GMC dealership brings the facility in line with current GM standards as well as providing a 'freshened' exterior and interior for the entire facility."

Wolverine Building, Inc. is a full-service general contractor with more than 65 years of experience providing exceptional construction services to industrial and commercial clients throughout West and Central Michigan.
