Grand Rapids Plastics Expands Warehouse

Wyoming, MI – (May 30, 2008) Grand Rapids Plastics returns to Wolverine Building, Inc. to expand their production warehouse space. Located in Wyoming, Grand Rapids Plastics is a premier plastics molding and plastics assembly manufacturer. Known for specializing in automotive, office furniture and appliance products, Grand Rapids Plastics is in need to enlarge their production floor.

This design/build addition will include over 27,000 square feet of new warehouse space to add to their existing 80,000 square foot campus. Wolverine will be constructing the building from pre-engineered steel. The new facility will house additional extrusion machinery for Grand Rapids Plastics increased production requirements. The project has recently begun construction and plan to finish by this Fall 2008.

According to project manager, Jim Ziegler, “With the demise of companies like Plastech and other unfortunate plastic manufacturers, Grand Rapids Plastics is preparing itself to respond to the future injection molding demand from the automotive, furniture, and appliance industries.”

Wolverine Building, Inc. is a full-service general contractor with more than 68 years of experience providing exceptional construction services to industrial and commercial clients throughout West and Central Michigan.
