

FOR IMMEDIATE RELEASE

Johnson Controls Improvements Complete.

Holland, MI – (April 28, 2008) Wolverine Building, Inc. is pleased to announce the completion of facility improvements for Johnson Controls, located at 1600 S. Washington in Holland.

The JCI South View facility now has a completed roof improvements of over 35,000 square feet of architectural seamed metal roof panel. The panels are radius formed on site to ensure proper configuration from the previous roof surface.

According to project manager, Adam Tuffs, “Johnson Controls was looking for a cost effective solution to repair there existing Kalwall Curve roof, which had been leaking extensively for the past few years. We came up with a solution to seal the existing Kalwall with ice & water shield, and then cover it with an architectural standing seam roof panel. This solution provided JCI with the best possible fix to there water problem, while keeping the project within budget.”

Wolverine Building, Inc. is a full-service general contractor with more than 65 years of experience providing construction services to clients throughout Western and Central Michigan. They specialize in the construction of commercial and industrial facilities, including office, retail, churches, warehouses, and manufacturing buildings.
