

26TH ANNUAL

And the winners are...

On October 25th, ABC's Western Michigan Chapter honored the winners of the 2011 Construction "Awards of Excellence" Program. 31 judges - area architects, engineers, facility directors, educators, and building inspectors - selected the "best of the best". These award winning projects demonstrate exceptional quality construction performed by ABC members and their employees. ABC is an association of over 400 "merit shop" general contractors, sub-contractors, suppliers and associates. ABC members are the builders of schools, churches, hospitals, industrial plants, shopping malls, highways, office buildings & recreational/entertainment facilities.
